Council Motion – Traffic Flow Torquay Town Centre

This council requests that the Mayor identifies the necessary financing to reverse traffic flow in to Torquay town centre through Torre.

Council notes that recommendations from Princes Foundation, who advised Torquay Neighbourhood Forum, identified the access to the town as one that needed improving.

Council further notes that the recent Local Transport Board rejected an application for funding from the recent process and therefore alternative funding needs to be identified as a priority.

Council recognises that improving direct access in to the town will help encourage potential investors to develop sites identified within the emerging Torquay Neighbourhood Plan and in so doing stimulate regeneration.

Proposed by Councillor Cowell
